

Adebayo Azeez

Full Stack Web Developer

Professional Summary

Passionate Full Stack Web Developer with 5+ years of experience building scalable, user-centric web applications. Proven track record of implementing systematic features and delivering high-quality solutions that improve business operations and user experience. Expertise in modern JavaScript frameworks, backend technologies, and cloud deployment. Strong collaborative skills with experience in cross-functional teams and agile development environments.

EXPERIENCE

Full Stack Developer

Intelial Software Designs

Jul 2025 – Present

- **Restaurant management application:** Designed and support daily operations across frontend and backend components to ensure system reliability, performance, and scalability while continuously improving existing features based on operational needs.
- **Implemented secure and reliable payment system:** Implemented different payment gateway API, seamless transaction processing and accurate order reconciliation.
- **Terminal Printing system:** Implemented cron jobs for real-time receipt and order printing upon successful order placement, significantly reducing manual intervention and improving order processing speed within the restaurant workflow.
- **Inventory management system:** Track stock levels, manage item availability, and support data-driven restocking decisions, helping to reduce stockouts and wastage.
- **Automated Whatsapp messaging:** Implemented cron system to send real-time notifications to customers and internal teams base on delay orders, customer feedbacks and system alert, improving communication and customer engagement.

Technical Skills

Frontend Development

HTML5	CSS3
JavaScript ES6+	TypeScript
React.js	Next.js
SASS/SCSS	Tailwind CSS
Bootstrap	Ant Design

Backend Development

Node.js	Express.js
Next.js	Feather.js
Python	Django
Flask	REST APIs
GraphQL	WebSocket

Database & Tools

MySQL	PostgreSQL
MongoDB	Git
Linux	AWS
DigitalOcean	NameCheap

Full Stack Developer

ExcellentBridge Software Solutions

Oct 2023 – Nov 2025

- **Enhanced Security Infrastructure:** Implemented critical security features including two-factor authentication (2FA), device detection, and auto-logout functionality, resulting in 50% improvement in application security
- **UI/UX Development:** Designed and developed intuitive, responsive user interfaces for multiple applications, ensuring seamless integration of complex functionalities
- **ERP System Integration:** Contributing to enterprise resource planning software evolution by integrating functionalities across multiple platforms, enhancing cross-application compatibility and user experience
- **Code Quality & Best Practices:** Maintained high code quality standards and implemented industry best practices for scalable application development

Freelance Web Developer

Self-Employed (HayZedd)

Sep 2022 - Present

- **Project Management:** Successfully managed multiple concurrent projects, consistently delivering high-quality results within specified timeframes
- **Client Collaboration:** Worked effectively with diverse teams and clients to understand requirements and deliver tailored web solutions
- **Cloud Deployment:** Extensive experience deploying applications on various cloud platforms including AWS, DigitalOcean, Heroku, and Vercel
- **Continuous Learning:** Maintained up-to-date knowledge of emerging technologies and industry trends, implementing modern development practices

Fullstack Web Developer

Runneth-over (Affiliate market system)

Oct 2025

- **AI-powered visual search using Google Vision:** The platform allows users to upload images of products and intelligently match them against a multi-brand catalog, enabling seamless discovery without relying solely on text-based searches.
- **Affiliate Platform integration:** Integrated CJ affiliate system and google SERP API to fetch products from multiple products platforms.
- **Admin Analytics Dashboard:** provides insights into user behavior, product performance, and search trends.
- **Authentication, Favourites, profile management.**
- **Hosting and Deployments:** Deployed web application on Vercel with custom domain configuration using external DNS management to Porkbun.

Notable Implementation

Security Enhancement

Implemented comprehensive security suite including 2FA, Oauth, refresh token and device detection, improving system security by 50%

ERP Application

Successfully integrated multiple application platforms in ERP system, invoicing, payroll, warehouse, assets and customers management

Cloud Deployment Expertise

Deployed numerous applications across various cloud platforms with focus on performance and cost optimization

Restaurant Management

Build and manage contributed to streamlining restaurant operations, improving efficiency, and delivering a more seamless experience for both staff and customers. ion

Full Stack Proficiency

Demonstrated expertise across the entire development stack from database design to user interface implementation

Live video Streaming

Implemented media processing pipelines using FFmpeg for HLS video streaming, including transcoding, segmentation, and adaptive bitrate delivery.

Fullstack Web Developer

Moodbrary (AI-powered artifact search platform)

Sep 2025

- AI-powered search using GPT-5: Designed to help users discover design and architectural products from a varieties of artifact by filling some criteria question and uploading sample color image.
- Admin Analytics Dashboard: provides insights into user behavior, product performance, and search trends.
- Authentication, Favourites, profile management.
- Hosting and Deployment: Deployed the application on Vercel while mapping a third-party domain (purchased and managed on Squarespace) to the Vercel deployment via DNS records.

Fullstack Web Developer

Errandbuddies (Multi-tenant E-commerce platform)

Sep 2025

- Product and Service Management: Developed the backend and Designed the frontend of both vendor and customer face of an E-commerce website where vendor can create an account, upload product and service and meet with customers globally.
- Product Sponsorship and interaction insight: Ability for vendor to sponsor a product such that it appears top on search results and as add on some pages while also providing insights of customer's view, favoured and added to cart for the vendor.
- Third-party delivery services: Integrated with multiple third party delivery services. The system can automatically determine the delivery service to handle a delivery base on the time, price, package size.
- Auto-Fulfil orders and vendor credit: Implemented cron workers to automatically decline orders that are not attended to after some working period and also automacally credit vendor's wallet after the dispatch and grace period.

EDUCATION & CERTIFICATIONS

B.Sc Computer Science

2023

Federal University of Agriculture, Abeokuta

Diploma in Web Development

2024

Zulfah Academy, Maryland, Lagos

- Backend Development & APIs
- Database Design & Management
- Software Engineering Practices

Special Packages and APIs

Paystack, Nomba, Flutterwave.

Integrated multiple payment gateways with support for secure payment processing, payouts and transfers, webhook handling, idempotent transaction processing, and reliable transaction lifecycle management.

Facebook graph analytics and whatsapp messaging

Integrated Facebook Graph API for analytics, insights, and data retrieval, and implemented WhatsApp messaging for automated notifications, user communication, and event-based messaging workflows.

GPT-5 API

Integrated for image processing and intelligent data analysis, enabling automated insights extraction, content understanding, and enhanced decision-making workflows.

Distance matrix API

Implemented for real-time distance and travel-time calculations to support routing logic, delivery estimation, and location-based decision-making.

Social Platform Interaction

Used OAuth authentication, scheduled content publishing, engagement and comment analytics, to support multi social platform management.
